**SUPERVISOR RIDLEY-THOMAS URGES EXPEDITIOUS EIR
PROCESS FOR NEW MLK MULTI-SERVICE AMBULATORY
CARE CENTER REPLACEMENT PROJECT AND MASTER PLAN**

LOS ANGELES – To ensure the design of the Multi-Service Ambulatory Care Center at the new Martin Luther King Jr. Hospital is completed in time for the County to fully qualify for federal stimulus money, Supervisor Mark Ridley-Thomas today called for an expeditious process to develop an environmental impact report and master plan for the hospital campus.

The Board of Supervisors approved a motion by Supervisor Ridley-Thomas that instructs the County's Chief Executive Office to immediately proceed with development of the EIR and master plan.

The Board last month approved a plan to open a new, 120-bed MLK Hospital. Under the proposal, the University of California would provide physician services. The UC Regents are scheduled to discuss the proposed deal with the County at their meeting Thursday in San Francisco and vote on the matter in November.

At its Sept. 8 meeting, the Board of Supervisors, acting on a motion by the Supervisor, instructed the CEO and Department of Public Works to provide a report on actions it must take to ensure that the design of the Multi-Service Ambulatory Care Center is completed by the deadline. The stimulus bonds must be issued no later than December 31, 2010.

Supervisor Ridley-Thomas said it is critical that the County protect its ability to meet all deadlines to fully leverage stimulus dollars while the County waits for the Regents to act.

Based on analysis by the Department of Public Works, the Board must immediately begin the environmental impact analysis for the Multi-Service Ambulatory Care Center to ensure timely issuance of the bonds.

Wording from previous release

Supervisor Mark-Ridley Thomas today lauded his colleagues on the Board of Supervisors for approving a \$322.6 million budget for the Harbor-UCLA Medical Center Surgery/Emergency Capital Project.

To meet a growing need exacerbated by the closure of the Martin Luther King Medical Center in 2007, the Harbor-UCLA project will expand the facility's emergency department from 25,000 square feet to 75,000 square feet, add seven operating rooms, and nearly double its emergency room bays from 42 to 80 bays.

"This historic capital investment demonstrates yet again that our county Board of Supervisors is resolute about supporting the emergency care needs of its residents through state of the art facilities and quality care," Supervisor Ridley-Thomas said during Tuesday's Board meeting.

Supervisor Ridley-Thomas praised his board colleagues for moving on the Harbor-UCLA Medical Center project, adding "this facility will add value and improve the safety net for the entire County."

On another matter, emphasizing the need to fully leverage federal stimulus money to build a new Martin Luther King Jr. Hospital, Supervisor Mark Ridley-Thomas directed the County's Chief Executive Officer to report back on the County's steps to ensure that the design of the project's Multiservice Ambulatory

Care Center is completed in time for the County to maximize federal support. On Aug. 18, the Board approved a plan to open a new, 120-bed MLK hospital. Under the proposal, the University of California would provide physician services.

Supervisor Ridley-Thomas said it is critical that the county protect its ability to meet all deadlines to fully leverage stimulus dollars available through the American Recovery Reinvestment Act, as the County waits for the UC regents to act.

"The County could qualify for roughly \$145 million in ARRA funds to support the rebuild of the (MLK) Multiservice Ambulatory Care Center," the Supervisor said.

His motion directs county officials to report back to the Board on Sept. 15 on a schedule of steps the Board must take to ensure the rebuild of the ambulatory

care center fully qualifies for stimulus money.
